

SauceDemo - Defect Management

Final Consolidated Portfolio Artifact

Document ID	QA-DM-001	Version	2.0 - Consolidated Final
Application	SauceDemo / Swag Labs	Prepared By	Nancy McKenzie
Primary Test Case	TC-041	Confirmed Defects	3

Purpose

This document combines the defect-management framework with the three defects confirmed during manual execution of TC-041. Each defect is tracked separately for independent review, correction, retesting, and closure.

Confirmed Defect Summary

Defect	Product	Issue	Severity	Priority	Status
BUG-001	Test.allTheThings() T-Shirt (Red)	Image inconsistent with stated product type/color.	Medium	P3	New
BUG-002	Sauce Labs Bolt T-Shirt	Red bolt described in text is not visible in image.	Medium	P3	New
BUG-003	Sauce Labs Onesie	Description states 3 snaps; image visibly shows 2.	Medium	P3	New

BUG-001 - Product image inconsistent with Test.allTheThings() T-Shirt (Red) information

Test Case	TC-041	Scenario	TS-023	Requirement	NFR-004
Module	Product Information / UI	Severity / Priority	Medium / P3	Status	New
Environment	SauceDemo / Google Chrome	Evidence	BUG-001_Product_Image_Information_Mismatch.png	Reported By	Nancy McKenzie

Observed Result

The product is identified and described as a red T-shirt; however, the displayed image appears to show an orange long-sleeved sweatshirt/sweater-style garment.

Steps to Reproduce

- 1. Log in with standard_user.
- 2. Navigate to Products.
- 3. Locate Test.allTheThings() T-Shirt (Red).
- 4. Compare name/description with the image.

Expected Result

The product image should be consistent with the advertised product type and color described in the product information.

Notes

Product image appears inconsistent with both the advertised product type and color.

BUG-002 - Red bolt graphic missing from Sauce Labs Bolt T-Shirt image

Test Case	TC-041	Scenario	TS-023	Requirement	NFR-004
Module	Product Information / UI	Severity / Priority	Medium / P3	Status	New
Environment	SauceDemo / Google Chrome	Evidence	BUG-002_Bolt_TShirt_Missing_Red_Bolt.png	Reported By	Nancy McKenzie

Observed Result

The product description states that the Sauce Labs Bolt T-Shirt is heather gray with a red bolt; however, the displayed product image does not show the described red bolt design.

Steps to Reproduce

- 1. Log in with standard_user.
- 2. Navigate to Products.
- 3. Locate Sauce Labs Bolt T-Shirt.
- 4. Compare the description with the image.

Expected Result

The product image should visually match the description, including the stated red bolt design.

Notes

Missing red bolt is an objective image/description inconsistency.

BUG-003 - Sauce Labs Onesie image does not match stated 3-snap closure

Test Case	TC-041	Scenario	TS-023	Requirement	NFR-004
Module	Product Information / UI	Severity / Priority	Medium / P3	Status	New
Environment	SauceDemo / Google Chrome	Evidence	BUG-003_Onesie_Snap_Closure_Mismatch.png	Reported By	Nancy McKenzie

Observed Result

The product description states that the Sauce Labs Onesie has a reinforced 3-snap bottom closure; however, the displayed product image visibly shows only two bottom snaps.

Steps to Reproduce

1. Log in with standard_user.
2. Navigate to Products.
3. Locate Sauce Labs Onesie.
4. Compare description with the image.
5. Count visible bottom snaps.

Expected Result

The product image should accurately reflect the stated three-snap bottom closure.

Notes

Separate defect because it affects a different product and can be fixed/retested independently.

Defect Workflow

Status	Meaning	QA Action	Typical Next Status
New	Defect has been logged.	Document evidence and impact.	Confirmed / Rejected
Confirmed	Issue has been validated.	Provide complete reproduction details.	In Progress
In Progress	Fix is being worked on.	Remain available for clarification.	Fixed
Fixed	Developer reports correction.	Prepare for retest.	Ready for Retest
Ready for Retest	Fix is available to QA.	Re-execute failed test and related regression.	Closed / In Progress
Closed	Retest passed.	Record result and closure date.	-

Severity and Priority

All three confirmed defects are classified as Medium severity / P3 priority because they affect accuracy and product presentation but do not block the core purchase workflow.
