

SAUCEDEMO - TEST SCENARIOS

QA-TS-001 | Version 1.0 | Prepared by Nancy McKenzie | Manual QA Portfolio Project

Twenty-four high-level test scenarios mapped to the requirements baseline in QA-BRD-001. These scenarios define planned coverage before detailed test-case development.

Scenario ID	Requirement ID(s)	Module	Test Scenario	Test Type	Priority	Expected High-Level Outcome	Status
TS-001	REQ-001	Authentication	Verify a recognized, non-locked user can log in with valid credentials.	Positive / Functional	Critical	User is authenticated and inventory page opens.	Planned
TS-002	REQ-002	Authentication	Verify login is rejected when the username is invalid.	Negative / Validation	Critical	Access is denied and a clear error message is displayed.	Planned
TS-003	REQ-002	Authentication	Verify login is rejected when the password is invalid or required credentials are blank.	Negative / Validation	Critical	Access is denied and validation feedback is displayed.	Planned
TS-004	REQ-003	Authentication	Verify a locked-out user cannot access the application.	Negative / Functional	Critical	Locked-out user remains unauthenticated and receives an explanatory error.	Planned
TS-005	REQ-004, REQ-005	Inventory	Verify inventory is displayed after successful login with complete product information.	Positive / Functional	Critical	Inventory shows available products with names, images, descriptions, and prices.	Planned
TS-006	REQ-006	Inventory	Verify product sorting works for all available sort options.	Functional / Data Presentation	High	Products reorder consistently with the selected sort option.	Planned
TS-007	REQ-007	Product Details	Verify a user can open a product detail page and return to inventory.	Functional / Navigation	Medium	Correct product details display and back navigation works.	Planned
TS-008	REQ-008	Cart	Verify a single product can be added to the shopping cart.	Positive / Functional	Critical	Selected product is added and cart badge updates.	Planned
TS-009	REQ-008, REQ-010	Cart	Verify multiple products can be added and are accurately represented in the cart.	Positive / Functional	Critical	All selected products appear with correct identifying information.	Planned
TS-010	REQ-009	Cart	Verify a selected product can be removed before or from the cart.	Functional	Critical	Removed product is no longer selected and badge count decreases.	Planned
TS-011	REQ-010, BRULE-03	Cart	Verify the cart badge accurately reflects the number of selected products.	Functional / State Validation	High	Badge count matches current cart contents throughout shopping actions.	Planned
TS-012	REQ-011	Cart	Verify Continue Shopping returns the user to inventory without losing valid cart selections.	Functional / Navigation	Medium	Inventory reopens and selected cart items remain intact.	Planned
TS-013	REQ-012	Checkout	Verify a user with items in the cart can begin checkout.	Positive / Functional	Critical	Checkout customer-information page opens successfully.	Planned
TS-014	REQ-013	Checkout	Verify checkout cannot continue when first name is missing.	Negative / Validation	Critical	Progress is blocked and a clear first-name validation error is displayed.	Planned
TS-015	REQ-013	Checkout	Verify checkout cannot continue when last name is missing.	Negative / Validation	Critical	Progress is blocked and a clear last-name validation error is displayed.	Planned
TS-016	REQ-013	Checkout	Verify checkout cannot continue when postal code is missing.	Negative / Validation	Critical	Progress is blocked and a clear postal-code validation error is displayed.	Planned
TS-017	REQ-013, REQ-014	Checkout	Verify valid customer information advances the user to the order overview.	Positive / Functional	Critical	Order overview opens and selected cart items are retained.	Planned
TS-018	REQ-014	Checkout	Verify the order overview accurately displays selected items and purchase details.	Functional / Data Validation	Critical	Overview reflects the items selected for purchase.	Planned
TS-019	REQ-015	Checkout	Verify subtotal, tax, and total are internally consistent on the order overview.	Functional / Calculation Validation	Critical	Displayed pricing values reconcile correctly for the order.	Planned

Scenario ID	Requirement ID(s)	Module	Test Scenario	Test Type	Priority	Expected High-Level Outcome	Status
TS-020	REQ-016	Order Completion	Verify a valid checkout can be completed successfully.	End-to-End / Functional	Critical	Finish completes the order and a success confirmation is displayed.	Planned
TS-021	REQ-017	Navigation	Verify application menu actions navigate or update the application as expected.	Functional / Navigation	High	Available menu options perform the expected action without corrupting state.	Planned
TS-022	REQ-018, BRULE-08	Session	Verify an authenticated user can log out and cannot continue normal authenticated navigation.	Functional / Session	High	User returns to login and authenticated session is ended.	Planned
TS-023	NFR-001, NFR-003, NFR-004	Usability & UI	Verify primary labels, messages, product information, and shopping actions are readable and understandable.	Usability / UI	High	Core workflow is understandable and error feedback is clear enough to act on.	Planned
TS-024	REQ-001, REQ-004, REQ-008, REQ-012, REQ-013, REQ-014, REQ-015, REQ-016, NFR-002, NFR-006	End-to-End	Verify the complete standard purchase journey from login through successful order completion.	Smoke / Regression / E2E	Critical	User completes the core purchase path with consistent state, navigation, calculations, and confirmation.	Planned
